CITY OF CLEVELAND MASTER FEE SCHEDULE

SERVICE

FEE

The mitigation rates above are average "billing levels" for one hour of service, and are typical for the incident responses listed, however, when a claim is submitted, it may be itemized and based on the actual services provided.

These average mitigation rates were determined by itemizing costs for a typical run (from the time a fire apparatus leaves the station until it returns to the station) and are based on the actual costs, using amortized schedules for apparatus (including useful life, equipment, repairs, and maintenance) and labor rates (an average department's "actual personnel expense" and not just a firefighter's basic wage). The actual personnel expense includes costs such as wages, retirement, benefits, workers comp, insurance, etc.
